FLORE – WC BLEACHING GEL	
TECHNICAL DATA SHEET TL 679/2013	
Date of Issue: 2. 9. 2013	Date of Revision: 21. 4. 2016

Product Characteristics

Alkaline aqueous solution of sodium hypochlorite and surfactants with addition of perfume composition.

Applications

Liquid agent intended for disinfecting, washing and cleaning of sanitary conveniences. It can be also used for washing and cleaning of areas, surfaces and pools.

Product Features

FLORE – WC BLEACHING GEL is a flavescent or mildly greenish, slightly opalescent and moderately viscous liquid

Directions for Use

The product is used as a germicidal, fungicidal, cleaning and bleaching agent for areas and surfaces. The agent is used in a concentrated state. When diluted with water in a ration 1:4, the agent can also be used for bleaching textiles. It kills germs and fungi. Surfaces are left shiny and hygienically clean. The agent effectively removes faded stains and grease. It cleans even hard to reach places. Suitable for stainless steel, porcelain, ceramics and plastic.

The agent must not be used on objects made of coloured metals or polyamide. Colour unstable objects might be decolourized. If objects or areas on which the agent was applied might get in contact with food or feed, it is recommended to rinse them thoroughly.

The agent must not be used on ferrous metals, aluminium and its alloys. When such areas or objects are affected by the product, rinse them with water immediately.

Packaging & Storage

FLORE – WC BLEACHING GEL is delivered in 750 ml PE bottles. Alternatively, it can be delivered in different containers that were discussed and agreed on in advance.

Store it in a sealed container in places protected from direct climatic influences. Must not be stored in the sun or near heat sources. Recommended storage temperature is between +5 to +25 °C. Short-term exposure to lower temperatures, e.g. during transport, does not affect product's application properties.

Transport

FLORE – WC BLEACHING GEL is transported by covered vehicles in compliance with ADR/RID Regulations.

Warranty

Provided the product is transported and stored in accordance with the above written conditions, its shelf life is 12 months from the production date.

Note

Data about the product characteristics and its processing were obtained by laboratory measurements and application tests. This technical data sheet can provide solely legal advice without any engagements. Use of the product should be always adjusted to specific conditions.

Proposed Text for the Label

**FLORE
WC BLEACHING GEL**

EN

**Liquid agent intended for disinfecting, washing and cleaning of sanitary conveniences.
It can be also used for washing and cleaning of areas, surfaces and pools.**

The agent is used for cleaning and sanitising purposes in households, health care, agriculture, food-processing industry etc.

Germicidal and fungicidal properties of the agent manifest 5 minutes from its application.

Concentration of sodium hypochlorite in the product is 4.5 g in 100 g.

Applications

The product is used as a germicidal, fungicidal, cleaning and bleaching agent for areas and surfaces. The agent is used in a concentrated state. When diluted with water in a ration 1:4, the agent can also be used for bleaching textiles.

It kills germs and fungi. Surfaces are left shiny and hygienically clean. The agent effectively removes faded stains and grease. It cleans even hard to reach places. Suitable for stainless steel, porcelain, ceramics and plastic.

The agent must not be used on objects made of coloured metals or polyamide. Colour unstable objects might be decolourized. If objects or areas on which the agent was applied might get in contact with food or feed, it is recommended to rinse them thoroughly.

The agent must not be used on ferrous metals, aluminium and its alloys. When such areas or objects are affected by the product, rinse them with water immediately.

Warning! Do not use the agent in combination with other products. It might release dangerous gases (chlorine).

Biocidal agents should be used with caution. Before use, always read product specifications and information about the product.

H315 Causes skin irritation. H319 Causes serious eye irritation. H400 Very toxic to aquatic life. EUH031 Contact with acids liberates toxic gas. P102 Keep out of reach of children. P260 Do not breathe dust/fume/gas/mist/vapours/spray. P280 Wear protective gloves/protective clothing/eye protection/ face protection. P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lens, if present and easy to do. Continue rinsing. P302+P352 IF ON SKIN: Wash with plenty of soap and water. P332+P313 If skin irritation occurs: Get medical advice/attention. P301+P312 IF SWALLOWED: Call a POISON CENTRE or doctor/physician if you feel unwell. P271 Use only outdoors or in a well-ventilated area. P273 Avoid release to the environment.

Container Disposal Directions

Before its disposal, rinse the container properly. Offer the container for recycling by taking it to designed collection points (e.g. containers for collection of plastic waste) or dispose of it by putting it to municipal waste.

Composition

Contains less than 5% of sodium hypochlorite, less than 5% of anionic surfactants, less than 5% of amphoteric surfactants (N,N-dimethyl-1-cocamine-N-oxide),
less than 5% of sodium hydroxide and perfume

Storage

In dry, sheltered and clean places. Keep the container closed. Recommended storage temperature is between +5 to +25 °C

Shelf Life

12 months from the production date indicated on the container
