CH-SEBON KO 20

TECHNICAL DATA SHEET

TL 706/2014

Date of issue: October 22nd, 2014

Revision date: ---

Product characteristics:

Aqueous-alcoholic solution of the potassium oleate, with addition of auxiliary substances.

Application:

CH-SEBON KO 20 is used:

- as the active foaming agent for the gelatination of both natural and synthetic rubber;
- as the active component of liquid detergents/washing agents;
- as the dust removal agent in production of perlite;
- for removal of the printing ink in recycling of paper;
- as the lubricant for various applications;
- as the separating agent in production of latex and rubber products (e.g. mattresses);
- there are no unrecommended applications stated.

Product characteristics:

CH-SEBON KO 20 is a colourless to yellowish liquid, clear, mixable with water.

CH-SEBON KO 20 must comply with the quality attributes as follows:

Quality attribute	Value	Method of determination
pH value of the 3% solution	8 to 10	PN-ZM 706/2014
Dry residue, in %	minimum 19	PN-ZM 706/2014
Appearance of product	colourless to yellowish liquid, clear	PN-ZM 706/2014

Processing of the product:

CH-SEBON KO 20 is produced from vegetable oils; it is used in so-called "bio-cosmetics". Due to its high washing and cleaning efficiency, it is also used in soap cleaning agents for wood (parquet and laminated floors, furniture, and so on), where it accentuates the natural colour of wood.

Packing & Storage:

CH-SEBON KO 20 is delivered in PE cans (volume 50 litres) or in other previously negotiated containers. It is to be stored in tightly closed containers, protected against the direct climatic influences. Recommended storage temperature range is +5°C to +25°C.

Transport:

CH-SEBON KO 20 is to be transported by means of closed transport vehicles. This product is not subject to DR/RID regulations.

Warranty period:
